

Save money, improve your pasture Soil Testing Campaign

Pricing valid 2/12/2024 through 2/26/2024

Campaign participant information:

Name:

Email address:

Address:

City:

State:

Zip:

This form is only valid for samples delivered to listed county Extension offices. Form is retained at county office and is not valid for any other use.

Circle Dropoff:

Brazoria, Fort Bend, Galveston, Harris

Make checks payable to:

Brazoria (Brazoria Ag Funds), Fort Bend (Fort Bend AHAC), Galveston (Brazoria Ag Funds), Harris (Harris County ANR Committee)

Note: All blanks for each row/soil sample must be answered to participate in this discounted rate campaign.

Have you soil sampled in the past three years?

Yes

No

Sample information: *required for discounted pricing.

Incomplete answers to questions and blanks

1	Routine: pH, Cond, P, K, Ca, Mg, S and Na	\$8.00	3	Routine: pH, Cond, P, K, Ca, Mg, S and NA	\$12.00
2	Routine: plus Micro: adds Fe, Zn, Cu and Mn to #1	\$15.00	4	Routine: plus Micro: adds Fe, Zn, Cu and Mn to #3	\$19.00

Procedure for Taking Soil Samples

Taking the Soil Sample (Refer to Figure 1)

- Take one composite sample for every 10 to 40 acres. A separate sample should be taken for:
 - ⇒ Areas with different soil types
 - ⇒ Areas with different land uses or fertilizer uses
 - ⇒ Areas with different terrain
- Approximately 1 pint of the composite soil sample is required for routine analyses. Additional sample is required for texture or detailed salinity (submit 2 sample bags marked identically).
 - Avoid sampling areas such as small gullies, slight field depressions, terrace waterways, or unusual areas.
 - When sampling fertilized fields, avoid sampling directly in fertilized band.

Taking a Composite Sample (Refer to Figures 2 and 3)

- Take a sample from 10 to 15 different areas.
- Use a spade, soil auger or soil sampling tube.
- Clear litter from the surface (do not remove decomposed black material).
- When using a soil auger or sampling tool, make the core or boring 6 inches deep into the soil (3 to 4 inches deep for permanent sod)
- When using a spade:
 - ⇒ Dig a V-shaped hole and take a 1 inch slice from the smooth side of the hole.
 - ⇒ Take a 1 x 1 inch core from the center of the shovel slice
- Repeat in 10 to 15 different places. Put in a clean plastic bucket or other non-metallic container, thoroughly mix and remove a pint (or more if additional tests are desired) as a composite sample representing the whole field or area.
 - To improve the nitrate-nitrogen analysis, samples may be **air dried** before sending to the laboratory. **Do not use heat** to dry samples.
 - Completely fill soil sample bag or other suitable pint container. Do not use old vegetable cans, tobacco cans, match boxes, glass containers, etc. to submit samples. If more than one sample bag is used, label bags as 1 of 2, 2 of 2, etc.
